SUMMARY

Five years across marketing, UX, and enterprise data. I now build what I design: front-end, audio tools, and applied AI. Looking for a product team in audio, transcription, or AI.

SELECTED BUILDS

AI mastering agent · Python, pedalboard, Claude — 2026 – Present

- Built an agent that masters a mix in a stateful, multi-step run, rendering candidates through FabFilter plugins.
- Shelved an active-learning model of my taste when blind tests showed it had learned the bias in my unblinded ratings, the known reward-model overoptimization failure.
- Every candidate is now loudness-matched (ITU-R BS.1770, true-peak limited) and judged blind against the untouched original, which won 26 of 58 votes (one rater, me, June to August 2026).

uxjon.com/case-studies/the-console

Audio catalog and search · Python, Whisper, librosa, Claude — 2026 – Present

- A pipeline I wrote alone transcribes, fingerprints, deduplicates, and classifies about 20,000 audio files by content; a phone app finds any of them by a word.

Browser instrument · TypeScript, Web Audio API — 2026 – Present

- Drum and bass patterns under keys played from the computer keyboard; it records takes as WAV files.

EXPERIENCE

CHS Inc. · Business Analyst, AI & BI Engineering — Aug 2023 – Present

- Built agents on the internal AI platform, then designed and wrote the docs, guides, and onboarding chat that teach people to use them; other tools are adopting its design system.
- Built a Python tool that writes each dbt model's lineage to Excel, Power BI, and stakeholder briefs in one pass.
- Used AI to find data models missing semantic context and added it in Alation with their developers.
- Coordinate releases for the go-to-market data engineering team at a Fortune 500 agricultural cooperative; its AI and BI products serve thousands of employees, farmers, and growers.

Raylu, Inc. · Product Designer (Freelance) — Jan – Oct 2023

- Designed the brand, components, and prototypes for an AI startup; the founders carried them into meetings that closed a $4M seed, and engineers built from the same file.

Crediverso · UX Design Lead — Feb 2021 – Jan 2023

- Led the design system and onboarding for a bilingual banking app serving US Hispanic households.
- Ran usability tests with 50+ participants; the revised main flow cut bounce from 40% to 25%.
- Grew the pre-launch channel from 700 to 2,100 followers with A/B-tested messaging.

EDUCATION

Harvard University — 2022

A.B. in Sociology, secondary field in History of Science

Dean's List (6×) · Rosenkrantz Discovery Grant

University of Minnesota — 2016 – 2018

Transfer years; returned to Harvard to graduate

SKILLS

Build: TypeScript, React, Astro, HTML/CSS, Python, FastAPI, Claude Code · **Design:** Figma, Framer, Adobe Creative Suite
Models & Audio: Web Audio API, Claude, Whisper, librosa, demucs, pedalboard · **Data:** SQL, dbt, Power BI, Alation

ATHLETICS Six-time state hurdles champion; set Minnesota's all-time 110m record and the University of Minnesota freshman record.
